

**INTEGRATED WELL INTEGRITY
COMPETENCY FORUM**

The Life Cycle of a Well

www.iwicf.com

Concept and Development

- Development of Sub-Surface SoR
- Feasibility Checks
- Risk Identification
- Rig Sizing
- Tangible Requirements
- Basic Cost Estimates

Suspension and Abandonment

- Temporary Suspension
- Permanent Abandonment
- Life Cycle Integrity Measures

Production

- Well and Reservoir Management
- Enhanced Oil Recovery
- Well Intervention
- Workovers
- Well Stimulation

Well Testing

- Rig Up Testing Equipment
- Execution of the Testing Program
- Rig Down Testing Equipment
- Well Cleanup

Design and Preparation

- Basis of Design
- Preparation of Well Programs
- Risk Mitigation
- Final Well AFE
- Development of Safe Operating Practices
- Management of Change (MoC) Process
- Recommended Working Procedures
- Award Contracts

Drilling Operations

- Rig Move to Drilling Location
- Execution of the Drilling Program
- Drill, Case and Cement to TD
- Well Cleanup

Well Completions

- Rig Up Completion Equipment
- Execution of the Lower Completion Program
- Execution of the Upper Completion Program
- Rig Down Completion Equipment
- Well Activation
